MATERIAL OF CONSTRUCTIONRubble and a little out  
stone, asphalt road bedOTHER EXISTING RECORDSSee - The Antietam and  
its Bridges - by Helen  
Ashe Hays - 1910.OTHER DATA

This bridge is similar to those built over the Antietam some of which date to the 18th Century. It is wide enough only for one way travel and the "hump" conceals a vehicle coming in the opposite direction. It must very shortly give place to a modern bridge. The stone work is quite irregular and only the tops of the buttresses are cut.

*John H. Hays*
